

## **SVE Truck Attachment**

Attachment for SVE Truck - Svetruck began in 1977, designing a service friendly, durable and reliable lift truck. When they started that year the company had a clear vision of the sort of business they would like to be and the kinds of products they wished to manufacture. Svetruck specializes in producing lift trucks that allow the one operating it to be able to function efficiently within challenging environments. Svetruck believes that being capable of executing safe and successful material handling in the best way possible helps to contribute to a positive working environment.

Their facility in Ljungby is home to the making of log-stackers, forklifts as well as container handlers. At present, Svetruck is proudly supplying forklifts worldwide.

Svetruck stays focused on the future and is still committed to maintaining their strong status for durability and reliability. Their fundamental method to high quality, solid experience and over thirty years of knowledge in the field, means they can provide the market brilliant solutions for all of their material handling requirements.
