

JLG Forklift Parts

JLG Forklift Part - In the late 1960's John L. Grove, with his wife Cora started out on a cross country trip in their RV. Recently retired, after spending several years working with his brother to assemble their crane business into an market leader, John had no idea that important trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling technologies was the end consequence of a road trip.

While on their journey, John spent time talking to former business acquaintances whom the Groves stopped to visit along the way. These conversations combined with a tragic incident-two workers being electrocuted on scaffolding when the Groves were traveling to the Hoover Dam- John discovered an infinite marketplace for a product that could promptly and securely elevate people in the air to accomplish maintenance and other construction functions.

Upon returning from their travels, John established a joint venture with two friends and bought a metal fabrication business in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty workers, they designed and sold the first JLG aerial work platform. The business incorporates some of the simple design elements of that original lift into current designs.

JLG forklifts have come a long way from the time when Mr. John L. Grove returned to town from his cross-country road trip and since the first aerial work platform debuted on the market. At present, the company proudly continues to expand itself into many marketplaces globally and develops new products to ensure clients are capable of being more effective and perform in the workplace within a safer environment.
