

Meritor Part

Meritor Part - The Meritor Company is a leading international supplier established upon 100 years of tradition of service and quality. Meritor specializes in integrated systems together with a range of modules and parts to the original machinery makers and aftermarket equipment within the transportation and industrial trades.

Meritor prides itself in the company's unique energy and believes that this energy contributes to their competitive advantage in the international operations. The business values all their customers and wants to guarantee their success while anticipating their different needs. Meritor starts with a philosophy which values diversity of individuals and their broad thought processes. Operating in 19 nations and hiring over 11,200 individuals, Meritor promotes collaboration and innovation among a team of knowledgeable experts.

By just employing future focused people, Meritor strongly believes these top-caliber workers will be able to rapidly get used to to changing environments and demonstrate the performance and commitment required in order to reach results in the competitive materials handling business. The company empowers their teams to make sound business decisions in order to enhance the overall success of the company. In return, Meritor provides all their staff different possibilities for personal and professional growth.

Their Advanced Engineering team is at the forefront of components and system engineering which consist of drivelines, axles, suspension and braking systems used for heavy duty and medium trucks, off-highway vehicles, buses, military vehicles and trailers. The Meritor Advanced Engineering team is growing. They launched a new technical center in Bangalore, India in September 2009 to be able to lead their advanced product development initiatives that represent the entire Asia Pacific region. This team is even responsible for supporting the needs of all their worldwide engineering personnel.

The Quality team at Meritor is a dynamic and customer-focused group that is dedicated to ensuring optimum growth at their aftermarket distribution facilities and production plant which are situated on 5 continents and in 19 nations.

The supplier development network is particularly located to be able to support new business development. Regional teams are supported by worldwide quality systems, centralized specialties and initiatives in Materials Engineering and Six Sigma. Meritor's growing Six Sigma program promotes a fact-based, data-driven approach to decision making within every part of the trade. The DFSS or also referred to as Design for Six Sigma ensures product reliability in each and every region. The team is even included transactional Green Belts who utilize Six Sigma tools to business processes and implement lean methods.
